width of blind (tick the right box [mm]) <input type="checkbox"/> standard <input type="checkbox"/> total	width of fabric [mm]  (only when it's other than standard)	height of blind** (tick the right box [mm]) <input type="checkbox"/> standard <input type="checkbox"/> guide channels <input type="checkbox"/> total	height h (explanation under the table and on pic. 3)	quantity [pcs]	control [L/R]	fabric name	equipment colour (cassette, guide channels)	side guide			height of mounting*	notes
								standard	arched	wide (only white)		

**Standard width:** width of cassette (without sides and end caps) Measurement made between edges of glazing bead (**pic. 1**).

**Total width:** width of cassette with sides and end caps.

**Width of fabric:** indicate only when it's other than standard, width of fabric it is 14 mm smaller than standard roller blind width – **pic. 1**.

**Standard height (pic. 2):** from the edge of top glazing bead to the end of bottom glazing bead

**Height of guide channels:** length of guide channels only. **Total height:** height of cassette + guide channels.

**Height H:** height required to set the stripes on proper position when the blind is lowered (closed)

To measure it correctly : use the cassette- put it on the window on the correct position and measure from the bottom of cassette to the bottom position of fabric. In case you don't indicate the height H, we can't guarantee the proper position of stripes when the blind is lowered (closed).

\* necessary to make the product that meets safety standards especially in terms of protecting young children from strangulation of the hanging loop.

\*\* maximum height (depending on fabric group) can be checked on page 75.

**Caution:** in case you don't tick the box of width and height, given dimensions will be treated as standard.
