| light   | <b>CAUTION.</b> In some of the screen fabrics, the front and back side of the fabric differ in appearance and light transmission properties. In the pattern, these fabrics are presented by 2 samples: "front" and "back". As a standard, the "front" of the fabric is on the outside of the building and the "back" is by the room side. |             |             |      |         |                        |   |                     |                   |                            |                    |                       |  |  |  | NING<br>tion in a                | a recess, the m | easur                     | ement s                             | should b | be |       |                       | +                               | <b>_</b>         | 7 + |                |  |
| If you want to "invert" the sides, please select the "back" option.                     |   |             |             |      |         |                        |   |                     |                   |                            |                    |                       | By installation in a recess, the measurement should be taken in 3 places and the <b>smallest value</b> should be specified in the order. |  |  |                                  |                 |                           |                                     |          |    |       |                       |                                 |                  |     |                |  |
